OPIOID USE DISORDER SPECIALIST SUPPORT FOR PRIMARY CARE

Collaborate in a virtual learning environment with experts from Truman Medical Centers, Washington University, Missouri Department of Mental Health, Assisted Recovery Centers of America and Jordan Valley Community Health.

Goals and objectives include:

- Decrease opioid-related morbidity and mortality rates by using a medication-first strategy
- Teach evidence-based principles for harm reduction, recovery and support strategies to supplement effective treatment
- Improve compassionate, patient-centered care for individuals with opioid use disorder

WHAT DOES OPIOID USE DISORDER ECHO OFFER?

- No cost CME for health care professionals
- Collaboration, support and ongoing learning with experts and other health care providers
- Integration of behavioral health in primary care
- No cost to participating sites or individuals

WHY SHOULD I PARTICIPATE?

Opioid Use Disorder ECHO empowers and supports primary care providers to more effectively and confidently treat patients suffering from opioid use issues. The Opioid Use Disorder ECHO integrates medical, pharmacological and psychological considerations into patient care.

HOW DOES IT WORK?

- Join an online video conference twice per month
- Share and discuss clinical cases
- Learn from opioid use disorder experts

- Opioid and Stimulant Use Disorder
- Benzodiazepines in Patients with OUD
- Suicide in Patients with OUD
- Treatment of Trauma, Anxiety and Depression in Patients with OUD
- Treatment of Alcohol Use Disorder

WHAT IS SHOW-ME ECHO?

ECHO (Extension for Community Healthcare Outcomes) uses videoconferencing to connect an interdisciplinary team of experts with primary care providers. They collaborate in interactive case-based learning sessions to help primary care providers develop advanced skills and best practices, which in turn increases the availability, quality and efficiency of patient care.

Show-Me ECHO at the University of Missouri is designated as an international SuperHub, meaning the founding ECHO program at the University of New Mexico has certified MU to train other organizations wanting to adopt the ECHO model.
